

Nokia 5510 Teardown

The manual shows the decomposition of a Nokia 5510 into its individual parts.

Written By: Ingmar Helmstaedt

INTRODUCTION

The manual shows the decomposition of a Nokia 5510 into its individual parts.

TOOLS:

- [T6 Torx screwdriver](#) (1)
- [iFixit Opening Tools](#) (1)
- [Magnetic Project Mat](#) (1)

optional zur besseren Organisation

Step 1 — Remove battery and SIM card

- First, open the battery cover.
- Then, remove the battery and the SIM card.

Step 2 — Removing the first 2 screws

- Use to remove a Torx T6 letter Dreher to the first 2 screws.
- Remove the screws with a pair of tweezers or the magnetic screwdriver.

Step 3 — Removing the Front Covers

- Now you have to be opened with a metallic opener both corners. Drive to carefully under the front cover and lever it to the anchorage.
